

SPECIFICATION POLYPROPYLENE

PP Grades	Comonomer type	Melt flow rate (at 230 ° C 2.16 kg), g / 10 min	Density, g / cm ³	Scope and properties
Film				
L H3066-03.O	homopolymer	2,9-3,9	0,90-0,91	production of biaxially oriented polypropylene film (BOPP), as a resin for laminating film and wrapper for snacks / bakery products, production of metallized film
Textile products				
L H5072-03.O	homopolymer	3,0-4,0	0,90-0,91	The production of elongated tape (raffia), which is used for: the production of woven cloth, for basic, burlap; industrial applications; production of geotextiles, tows and twine.
L H5088-25G.O	homopolymer	21,0-29,0	0,90-0,91	yarn, the fiber of which is used in the production of a covering thread for carpets.
Extrusion Molding				
L H3150-02.O	homopolymer	2,1-2,9	0,90-0,91	thermoforming and extrusion pneumatic forming for the production of packaging products
Injection				
L R7175-35.P	copolymer	30,0-40,0	0,885-0,905	manufacture of packaging and household utensils
